## **WirelessGate to Start Free Wi-Fi Service for Inbound Tourists at Arakurayama Sengen Park in Fujiyoshida City, Yamanashi**

WirelessGate, Inc. (Head Office: Shinagawa-ku, Tokyo; Representative Director and CEO: Takehiro Ikeda; hereinafter "WirelessGate"), a wireless broadband service provider, announces the progress of its Wi-Fi infrastructure business.

WirelessGate has provided the Wi-Fi infrastructure at Arakurayama Sengen Park, in Fujiyoshida City, Yamanashi, and has started free Wi-Fi service for tourists.

Arakurayama Sengen Park, established in October 1959, is a local park in Arakura, Fujiyoshida City, Yamanashi. The park has an area of about 4.3 hectares. Arakurafuji Sengen Shrine is located at the foot of Mt. Arakurayama with about 500 cherry trees and a war memorial pagoda. The park commands a panoramic view of the city with Mt. Fuji in the center. People visit the park to enjoy the cherry blossoms in the spring and it is also used as a hiking trail. In addition, the war memorial pagoda is symbolic for the citizens of Fujiyoshida City.

WirelessGate provides Wi-Fi service at Arakurayama Sengen Park to improve the convenience for tourists from Japan and overseas, the latter of which have recently been increasing in number. With this Wi-Fi infrastructure, tourists are able to use the Internet via smartphone or personal computer around the viewing deck of the Arakurayama Sengen Park. In the event of a disaster, the Wi-Fi infrastructure will be switched to the emergency unified SSID (00000 Japan) with the plan to provide a communication area that can act as a lifeline for tourists as well as residents living in the vicinity.

WirelessGate will continue to develop the Wi-Fi infrastructure and to support its operation and services for tourists visiting Fujiyoshida City so that they can enjoy reliable wireless broadband service.

## Future prospects

This release will exert a negligible influence on our consolidated performance for the term ending in December 2016. If any other influence on the prospects of our consolidated performance is expected, it will be swiftly disclosed.

WirelessGate will aim to expand the Wi-Fi infrastructure and improve the level of service provided so that everyone can enjoy a reliable wireless broadband service by utilizing the communication services it provides as an aggregator (integrated wireless carrier).
